

International Conference on Crystallography and Structural Chemistry on April 27-28, 2020

Osman ADIGUZEL

Professor, Department of Physics, Ankara University, Turkey, E-mail: oadiguzel52@gmail.com

Warm Welcome to all as we affably invite you to be a part of the **International Conference on Crystallography and Structural Chemistry** on **April 27-28, 2020** which will be held in **Barcelona, Spain**.

The congress will highlight the theme “**Expanding the novelties in the field of Crystallography**” to gather the researches, scientists, academicians and industrialists from around the world and also to set a common platform for discussion and exploring recent advances in [Crystallography](#) research.

The 2 days in April will be highly interactive when all the aspiring minds of the [structural chemistry](#) will come together to refine the structure of crystallography.

The [X-ray Crystallography](#) is a gathering of current trends in [Single-crystal X-ray diffraction](#) is the most powerful X-ray technique for [inorganic chemists](#). From the precise measurement of the intensity and angles at which an X-ray beam diffracts off a crystal, the arrangement of the atoms can be reconstructed. There is a large, indexed catalog of lattice constants for many minerals that is available for identification purposes.

We are expecting around 50+ Speaker and 100+ delegate participants excluding the students for our Conference.

The gathering of international experts and investigators in Spain will lead the conference discussion to the extent of exploring the new happenings and investigating the case studies and innovating the truth behind the [crystals](#) and [Crystalline Structure](#).

Enrol now to be present the sessions on [Crystallography](#), Nano Structure, Structural Isomerism, Crystalline solids, [Spectroscopy Applications](#), Chemical Crystallography, Crystallography of Novel Materials, X-Ray Crystallography, [Crystal Growth](#), Crystallography Applications, [NMR Spectroscopy](#) vs [X-ray Crystallography](#), Crystal Engineering, Biological Structure Determination, Advances in Neutron Diffraction, Nuclear Magnetic Resonance Crystallography.

The International Conference on [Crystallography](#) and [Structural Chemistry](#) 2020 will focus on the Application of Modern Chemistry, Advanced Spectroscopy and Variety of Crystallography Sessions, including Chemical Crystallography, Materials Science Crystallography, Biology

Crystallography, Electron Crystallography, Crystallography Applications by invited plenary lectures, symposia, seminars, invitations.

The forthcoming International Conference on [Crystallography](#) and [Structural chemistry](#) want to draw your attention for this esteemed event which is scheduled on April 27-28, 2020 in Barcelona, Spain. Join us to improve your knowledge in the field of [Crystallography](#) and [Structural Chemistry](#).

We would like to welcome you to join us and share your knowledge as well as your views at [Crystallography](#) and [Structural Chemistry](#) 2020 where you will be sure to have a meaningful experience with scholars around the world.

Get your research Crystallized in this [Crystallography 2020](#).
